

## Fasi di posa | Installation phases UN-TAP SYSTEM

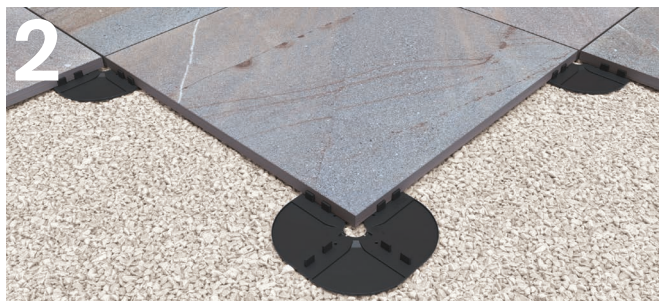

### Posa sul sottofondo

Adagiare il supporto **UN-TAP** sul sottofondo ad opportuno interasse.

### Starting the installation

Lay the **UN-TAP** support on the substrate at the appropriate distance between centres.

### Posa delle lastre

Adagiare le lastre sui supporti opportunamente distanziati. **I grandi spicchi del supporto UN-TAP** creano uno stabile piano di appoggio alle lastre per aumentare la stabilità della posa.

### Laying tiles

Place the slabs on the appropriately spaced supports. **The large segments of the UN-TAP** support create a stable support surface for the slabs to increase the stability of the installed system.
